FOR IMMEDIATE RELEASE

Doonan® Engineers New 'Series 2' V-Channel Trough Flatbed Coil Haul Trailer

GREAT BEND, KS (September 08, 2016) – Straight off of their highly successful industry introduction of a new coil haul (well design type) trailer, which made its debut at the 2016 MATS Show; Doonan® Specialized Trailer, LLC has designed and manufactured a new 'Series 2' V-channel trough flatbed coil haul trailer for special loading applications where coils cannot be transferred into and from a recessed trailer well, but still require safe securement on the flatbed.

Known for their longstanding credibility in the industry of designing and manufacturing specialized, heavy-duty application trailers, Doonan® has once again rose to the challenge of engineering a trailer that provides both stability and a safe coil hauling solution.

The 44' x 96", 110,000# GVWR, all-steel, tri-axle trailer with bulkhead, cradles 3' to 7' diameter steel coils shotgun style inside a V-shaped, rubber-lined steel trough on the center surface of the flatbed. This innovative channel cribbing cushions the coils and allows for efficient loading and removal from the trailer.

A convenient walkway on both sides of the channel allows for easy inspection of the load. Tie-downs can be applied by a driver from alongside the trailer to further support the securement of the coils, via a sliding winch track on both sides.

Components like the trailer's two custom main beams, ABS System, and Hendrickson HT Suspension make for strong and reliable heavy-haul coil transport. A sliding tarp system (not shown) is also added to eliminate the driver having to tarp the load.

"The new 'Series 2' V-channel coil haul trailer is a niche' market trailer that we designed to address a need in the marketplace," stated Kelly Zecha, National Dealer Manager/Application Specialist at Doonan®. "This model serves as yet another example of how Doonan® continues to lead the industry in developing innovative, specialized trailer solutions."

About Doonan® Specialized Trailer, LLC:

For over forty years, Doonan® Specialized Trailer, LLC has been dedicated to producing platform trailers that meet and exceed the specialized needs of owner operators. Its product lines include custom flatbeds, drop decks, oilfield trailers, extendibles, RGN lowbeds and double drops. Doonan® has an extensive network of independent Dealers located across the USA, Canada and Mexico. Headquartered in Great Bend, KS, Doonan® takes pride in its superior quality, craftsmanship and exceptional customer service.
