MEDIA RELEASE

FOR IMMEDIATE RELEASE

New, High-Efficiency Doonan® Manufacturing Plant Means New Flatbed Market Opportunities

GREAT BEND, KS (November 10, 2016) – Doonan® Specialized Trailer, a leading manufacturer of specialty platform trailers, including custom flatbeds, drop decks, oilfield trailers, extendibles, RGN lowbeds and double drops; announced it has "gutted" a 25,000 square foot manufacturing plant, previously used to 'stall build' custom trailer products, to create a new, high-efficiency flatbed trailer plant.

Doonan® will still build custom trailer products in its main factory, separate from its new high-efficiency flatbed trailer plant. The new plant will allow Doonan® to be more price competitive in the volume build flatbed trailer market.

New Doonan® 25,000 square foot, high-efficiency flatbed trailer plant.

“We look forward to the many new market opportunities this new plant brings Doonan®,” stated Mike Gordy, Co-Manager. Construction on the plant began early this summer, with high-efficiency flatbed trailer production slated to begin in January. Interested dealers and fleets are encouraged to call for a quote: 800-734-0608.
