

Coming Soon!

...The Launch of our Newly Re-designed Doonan.com Website

We are very excited to announce the upcoming launch of our newly redesigned website; featuring a bold, new modern look and an enhanced navigation experience.

As an industry leader, it's important for us to make information regarding our specialized trailer engineering and manufacturing solutions easily accessible for both our Dealers and your current and prospective Customers.

"Our Sales & Marketing team has worked diligently to put this website together," stated Michael Hinton, Manager, Marketing & Inside Sales. "It will be rich in information and designed to be used as a resource for obtaining the most accurate, up-to-date trailer information; as well as to share our knowledge and solutions-based expertise in the trailer industry."

The new responsive site will feature an eye-catching theme design that is easier to navigate, and more user-friendly. The primary objectives of our site development effort were focused on providing valuable new content and platform responsiveness for any device. You will also notice that our site will have the ability to be viewed with the same design features on any type of screen, whether it is a desktop, laptop, or mobile device.

Going forward, we will strive to continually expand our online content and keep you updated with the latest information. We pride ourselves on being a thought leader in the industry, and look forward to launching the site soon. We'll keep you posted of the official launch date, and look forward to hearing your feedback.

SPECIALTY PRODUCTS SHOWCASE:

The Doonan® Black Gold™ Drop Deck Tank Trailer with Pull-out Rear Bumper

Established Oil Services Company turns to Doonan® for quantity stock tank trailer transport engineering and manufacturing expertise.

A 22-year-old Oil Services Company, located in the Williston Basin region of the U.S., didn't trust their cargo to just anyone. They recently selected Doonan® to engineer and build 53' x 102" Black Gold™ Drop Deck Tank Trailers; enabling them to more efficiently and safely haul cumbersome 15' 6" diameter oilfield stock tank batteries, in support of their business partnerships with key production companies in the Bakken – an area known for one of the largest contiguous deposits of oil and natural gas in the U.S.

Designed for oversized, heavy-haul tank loads; the Customer's Black Gold™ Drop Deck trailers feature a 44' bottom deck length with continual length pipes the full-length between the main beams. A 6' pull-out rear bumper section incorporates two additional pipe fit extensions, accommodating large capacity tank lengths. Safety is engineered throughout, with safety locks on each side of the rear pull-out section and pins with lanyards on both pipe extensions.

Other key features of the specialized 2-axle trailer include, swing-out racks for cat-walk

storage, and carriers on the driver's side to contain the trailer's pipe extensions for ease of hauling. The all-steel beam construction of the trailer gives it a load capacity of 65,000#'s GVWR, and 30,000#'s concentrated in 10-feet to accommodate heavy hauls. Load securement is provided using Doonan® made D-Style strap anchors, opposite every winch.

Working to insure our Customer's "success" by providing superior equipment and valued-added solutions is why Doonan® continues to be the out-front leader in the specialized trailer industry.

Our Customers never have to settle for "satisfied." We hold ourselves to a higher standard: 100% success for every Customer, every time. Satisfaction is about meeting expectations, but success is about delivering the product we promised — **Our business model is simple: You define what you need to haul, and we'll engineer and build the trailer to suit your cargo.**
