Doonan Specialized Trailer, LLC Revolutionizes Battery Transport with Heavy-Duty Hauler

Doonan Specialized Trailer, LLC today announced the launch of its new Heavy-Duty Battery Hauler, designed for the safe and efficient transport of the heaviest battery loads. This innovative hauler maximizes trailer capacity and security, setting a new industry standard for battery transportation.

Built for durability and performance, the Heavy-Duty Battery Hauler features a robust steel frame with $\frac{3}{4}$ " x 5" inner beams at a 24" depth and a solid $\frac{1}{4}$ " web thickness. This rugged construction ensures the hauler can withstand the rigors of heavy-duty transport.

"We understand the challenges of transporting large, heavy batteries," said Matt Hensiek - Director of Engineering. "Our new Heavy-Duty Battery Hauler addresses these challenges head-on, providing a safe, secure, and efficient solution for our customers."

Key Features and Benefits:

Exceptional Capacity: Safely hauls up to 85,000-pound batteries, maximizing transport efficiency.

Enhanced Security: A reinforced neck with a 25" steel drop plate and a 17.5" BG/Dia drop ensures secure load transport. The deck features 1-3/8" Apitong in outer bays and aluminum in the center bay for the lower deck, and aluminum with three nailers for the top deck.

Optimal Stability: Three axles provide superior stability and control, even with the heaviest battery loads, minimizing the risk of accidents and ensuring safe delivery.

The Heavy-Duty Battery Hauler underscores Doonan Specialized Trailer LLC's commitment to providing innovative and reliable transportation solutions.
